Fight with Food

A Call to the Whole Dominion for the Utmost Effort to Produce Food for our Soldiers and Allies

OUR ALLIES are desperately short of food. In the midst of plenty ourselves we must face the stern reality of England on shorter rations than she has been for over a hundred years, and France with only three days' food reserve. Even from their present small supplies they are saving Italy from collapse through hunger.

Since shipping must be concentrated on the shortest routes, Canada and the United States must continue to be practically the only source of supply. Canada must provide wheat and meat in increasing quantities to meet a situation that imperils the issues of the war.

Men who can be spared for work on the farms must serve in this way. Those who are obliged to remain in the city or town can at least raise vegetables in their gardens or on vacant lots.

Every effort will be made to see that labor is forthcoming to harvest the maximum crops that farmers can produce.

An increased spring acreage in wheat and other grain is vitally needed.

Stock raisers are asked to provide the greatest possible production of meat, especially pork. Starvation is threatening our Allies. Everyone in Canada must fight by doing his or her utmost to produce and to conserve food.

Germans Have Failed to Take Important Positions

Several days ago the Germans launched their gigantic assault against the British between Lens and Ypres, but today the momentum of their attack has been broken and the waves of the Teutonic forces are recoiling before the rock of the British defence. While the Germans have made several gains of ground and have driven a wedge into the Allied lines to a considerable depth, they seem to have failed in their attempt to break through or take important railway junctions. During the last few days there have been bitterly fought engagements at four places, all on the north side of the salient to the south of Ypres. Seven assaults against the British trenches at Merville, near the apex of the triangular dent in the British line have been hurled back by the British. Neuve Eglise on the extreme southwestern spur of Messines ridge has been taken by the Germans after a struggle which will go into history as one of the greatest of the past week.

It is reported that the ground over which the fight is raging is piled high with German dead, the harvest of the machine guns, and the murderous tactics of the German high command in throwing their men in massed formations against the British.

Conscription and Home Rule for Ireland is again occupying the attention of the British government who will shortly bring in a bill covering both. A great deal of bitter-

ness is being expressed by the Irish leaders over conscription, but it is thought that both measures will pass in parliament.

AROUND THE TOWN

Mrs. A. Brusso and little son were visitors at Calgary last week.

W. McCoy has bought the Noehren farm adjoining the town on the southeast.

Mrs. Kendrick and Mrs. Harry Bricker will have charge of the Red Cross tea rooms on Friday.

Miss Eva Sexsmith who has been attending Queen's University, Kingston, for some months, returned home on Wednesday.

L. B. Fulkert and J. V. Berscht with his son Russell took in the Horse Show at Calgary last week.

Jack Cooper, the well known Didsbury horseman, was a visitor at the Calgary Horse Show last week.

Miss Putwain, of Lacombe, who is an experienced dry goods clerk, and Miss Lillo, of Calgary, stenographer, have accepted positions with Williams & Little at their large store in town.

Rev. G. Webb will conduct service at M. H. Brown's residence, Westerdale, on Sunday, April 21st, at 3.30 p.m., and Sunday school at 2.30 p.m. Everybody is cordially invited to attend.

Rheumatic Pains

Are relieved in a few days by taking 30 drops of Mother Seigel's Syrup after meals and on retiring. It dissolves the lime and acid accumulation in the muscles and joints so these deposits can be expelled, thus relieving pain and soreness. Seigel's Syrup, also known as "Extract of Roots," contains no dope nor other strong drugs to kill or mask the pain of rheumatism or lumbago, it removes the cause. 50c. a bottle at druggists.

Sugar Situation in Europe

Before the war England received approximately 1,400,000 long tons of sugar per annum from Germany and neighboring sources. France produced about 750,000 long tons of beet sugar and exported 50,000 tons. The French production in 1917 fell to 210,000 long tons. Before the war Italy produced about 210,000 long tons and imported almost none.

Minard's Liniment Cures Burns, etc.

Canadian Pacific Association For National Defence

How the Canadian Railways are Co-operating and Divesting Traffic to Relieve Congestion

It may be of general interest to the Canadian public to know some examples of the way in which their railways, through the Canadian Pacific Association for National Defence, are exchanging traffic in the interests of efficiency.

In one case the C. P. R. diverted by way of the Soo Line one thousand cars of freight so as to relieve the main line of the company along the north shore of Lake Superior. These cars passed south from Winnipeg to Minneapolis and by way of Sault Ste. Marie into Ontario. They consisted chiefly of grain for domestic consumption in Canada.

One hundred cars of freight per day are being diverted from the C. P. R. at Quebec and travelling by way of the National Transcontinental to Halifax. While there is no saving in mileage, this, in the interest of the country, relieves the C. P. R. main line to St. John for classes of export freight more urgently required there.

In Toronto an arrangement was successfully carried out whereby one hundred and twenty cars of freight eastbound for Montreal were turned over from the C. P. R. to the C. N. R. every day.

The Grand Trunk during the winter season has been diverting one hundred and fifty to two hundred cars of coal per day to the C. P. R. and T. H. & B. in order to lessen the congestion on the Grand Trunk from the Niagara frontier to Toronto and other points.

The Grand Trunk has also diverted fifty cars per day to the C. N. R. at Toronto.

In Western Canada the Canadian Northern has on several occasions transferred surplus traffic to the sister railways in the West.

The diameter of the dial of "Big Ben" is 22 feet 6 in.

Help to Produce Own Food

Grain Growers Should Be Free to Concentrate on Grain Production This Year

Speaking at the first of the series of meetings being held under the auspices of the Regina Poultry Association, Mr. F. Hedley Auld, deputy minister of agriculture for Saskatchewan, urged poultry breeders in the cities to devote some time to encouraging other citizens to take up poultry raising. Mr. Auld urged that the grain growers of the province should be left free to devote all their energies to producing grain. Poultry-raising, he said, was a work in which the urban population could enter without any trouble, and with little care, could make a success. With the urban population producing part of their own food supplies, either through vacant lot gardening, poultry raising, or hog raising where possible, it would leave that much more supplies which could be taken for the allies, who need food.

ALMOST HELPLESS FROM RHEUMATISM

Only Able to Move About on Crutches—Dr. Williams' Pink Pills Restored Activity

Inflammatory rheumatism, acute rheumatism and rheumatic fever are different names for practically the same thing. It comes on with hardly any warning. The pain is excruciating, and there is a tendency of the disease to attack the heart when it may have fatal results.

Any one who has suffered from an attack of inflammatory rheumatism knows that the usual treatment is highly unsatisfactory. External applications of hot cloths and liniments and internal doses of salicylates to relieve the pain are not enough, for they do not drive the poison from the blood, and the sufferer is liable to renewed attacks whenever exposed to cold or dampness.

To cure rheumatism so that it will stay cured the rheumatic poison in the blood must be driven out, and the blood made rich and red. When the blood is pure there can be no rheumatism. Dr. Williams' Pink Pills build up the blood, make it rich, red and pure and in this way cure the most obstinate cases of rheumatism. Mr. George Harbottle, R. R. No. 1, Faversham, Ont., is one whose cure through the use of Dr. Williams' Pink Pills is most striking. His mother gives the particulars of his attack and cure as follows:—

Some years ago while my son was working as a blacksmith in a Michigan lumber camp he was attacked with rheumatic fever. He was at once taken to a hospital at Marsenett, and was there under medical treatment for four months with but little or no relief. He then decided to go to Mount Clemens, where he took the baths for three weeks, but did not find any benefit from them. By this time he felt that his case was hopeless and decided to return home. When he reached home he could only move around by the use of a crutch and a cane. One knee was so stiff that he could not bend it, and most of his joints were swollen out of shape. He could neither dress nor undress himself and had to be helped like a child. I urged him to try Dr. Williams' Pink Pills and finally he consented to do so. He had only been taking the pills a few weeks when he could limp about, without the crutch, and his appetite greatly improved. This gave him new courage and, as he continued the use of the pills he showed constant improvement, and was able to walk about outside. He continued to use the pills for some four months, by which time every symptom of the trouble had disappeared, and he went to his work in Michigan a cured man. His case was well known to the neighbors around here and his cure was looked upon as marvelous, for everyone thought that at the best he was doomed to be a rheumatic cripple.

It is because they have made such wonderful cures as Mr. Harbottle's that Dr. Williams' Pink Pills have a world wide reputation, and are the only medicine used in thousands and thousands of homes. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Big Fur Production

That Alberta will this year have a fur production amounting to between \$10,000,000 and \$15,000,000 is the assertion of H. A. Simpson of Calgary. This is a vast increase over previous years, and the production this season is developing an export business undreamed of a few years ago. It was estimated that 50,000 coyote pelts alone will have been shipped out of the province this year before the summer comes and 1,500,000 rat hides. A great percentage of the rat skins are going to England, to be used in lining coats for men in the aviation division, while America vies with England in bidding for the coyote hides.

"Prosperity has ruined many a man."

"Well," ruminated the reprobate, "If I was going to be ruined, I'd prefer prosperity to do it."—Life.

ROYAL YEAST CAKES

Cannot Trust Germany

Can Be Trusted to Keep No Covenant When Violation Is to Its Own Interest

The British memorandum is especially explicit about Belgium. It demands as a foremost condition of peace full reparation by the German government and payment for all damage done. As to such large measures as a super-national authority, or League of Nations, and compulsory arbitration, these all assume for their success that governments which are parties to them can be trusted. But the present German government can be trusted to keep no covenant when violation is to its own interest. It has proclaimed and acted on that principle, and has never repudiated it. With the best will in the world, no one could ever be sure that it was not engaged in some treacherous intrigue or preparing some secret stroke, and all the nations would be incessantly watching it with suspicion and distrust. In other words, the war aims of Labor, as defined, assume a change of spirit in Germany which cannot be secured until the present military autocracy is discredited by palpable defeat.—London Times.

MRS. W. J. VALE TALKS OF DODD'S KIDNEY PILLS

She Also Tells How Her Dyspepsia Was Cured By Using Dodd's Dyspepsia Tablets.

Pandora, Alta., (Special)—"We are never without a box of Dodd's Kidney Pills in the house." That's what Mrs. W. J. Vale, a well-known and highly respected resident of this place has to say of the great Canadian kidney remedy. "My husband suffers from lumbago, and they always help him," is the reason that she gives.

"I must also tell you," Mrs. Vale continued, "what Dodd's Dyspepsia Tablets did for me. They cured me of a very bad attack of dyspepsia. I have also derived great benefit from the use of Dodd's Kidney Pills."

It is evidence like this that proves that the Dodd's remedies have gained a permanent place in the family medicine chests of the West. Dodd's Kidney Pills are particularly popular. The success with which they have been used to treat all kinds of kidney ills from backache to rheumatism and Bright's disease have earned for them the gratitude of thousands of people on this side of the Great Lakes.

She—"Have you ever been wounded in an engagement?"

He—"Oh, yes; when my fiancée broke off our last one I was fearfully cut up."

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

Had His 'x'mptions With Him
A husky negro, with six children trailing behind him appeared at a district board.

"Ah claim 'x'mption," he said, "and Ah got mah 'x'mptions with me."

IF you are a martyr to Pains in the Back, Urinary or Bladder Troubles, Brick Dust Deposits, Painful Urination, Swollen joints or any of the various symptoms of Kidney Trouble, take

Improvements in Transportation

Returned Soldiers Will Be in Charge of Experienced Officers on Journey Home

In regard to the complaints that have been made as to improper treatment on shipboard of returning soldiers, the statement is authorized by the militia department that a new system is about to be adopted, that should lead to improved conditions. In future conducting parties of experienced officers will accompany parties of draftees. On their return trip they will have charge of parties of returned soldiers. In view of the fact that the draftees under the military service act are being sent to England with very little training it is necessary that they should be put in charge of officers of exceptional ability and experience. The utilization of these officers in looking after the care of soldiers en route to Canada after service at the front is expected to lead to greatly improved conditions on shipboard, and a lessening of complaints on the part of the men in the future. The officials of the headquarters staff say that they are extremely anxious to remove all cause of complaint on the part of the men.

How Sickly Women May Get Health

If they could only be made to see that half their ills are caused by impure blood, it wouldn't take long to cure them with Dr. Hamilton's Pills. Truly a wonderful medicine that invigorates, strengthens, renews. Every tired, worn out, woman that tries Dr. Hamilton's Pills will improve rapidly, will have better color, increased appetite and better digestion.

No better rebuilding tonic can be found than Dr. Hamilton's Pills which are safe, mild and health giving. For forty years Dr. Hamilton's Pills have been America's most valued family medicine, 25c per box at all dealers.

Agricultural Instruction

Many Alberta Farmers Profit by Short Courses

The first of the short course schools under the plan of the department of agriculture of Alberta was held at Macleod, and has been most successful. The course occupied two days, and on both days there was a very large attendance of farmers from the surrounding district, who followed the lectures with much interest. Silos and silage crops, sheep raising, alfalfa, varieties of grain suitable to the locality, soil cultivation, were among the subjects treated upon. The opinion of the farmers was that the lectures would be of much benefit to them and all returned to their farms determined to put into practice the views expressed.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will cure a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, cure the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself, and can be got for a quarter of a dollar.

"All the writers on that funny paper have resigned."

"Ha, ha! then the editor has literally lost his wits."—Baltimore American.

To whom it may concern: This is to certify that I have used MINARD'S LINIMENT myself as well as prescribed it in my practice where a liniment was required and have never failed to get the desired effect.

Australian Soldiers Like Hospital Rinks

Anzacs Learn to Skate During Their Convalescence in Canada

The Australian soldiers, like the Canadians, have seen a bit of the world in their military service, but according to the men from the southern Commonwealth they have seen nothing in the way of sport that appealed to them more than the hockey matches they have watched on the Canadian rinks.

At Cobourg where a number of these men are under treatment in the Ontario military convalescent hospital they have enjoyed the open air rink in connection with the institutions, and learned to cut a few curves themselves. The fine expanses of skating surface in Canada are a novelty to them.

"People should marry their opposites."

"Most people are convinced that they did."—Winnipeg Telegram.

Railroad Men

These men know from experience that Sloan's Liniment will take the stiffness out of joints and the soreness out of muscles—And it's so convenient! No rubbing required. It quickly penetrates and brings relief. Easy to apply and cleaner than musky plasters or ointments.

Always have a bottle in the house for rheumatic aches, lame back, sprains and strains.

Generous sized bottles at all druggists.

Sloan's Liniment KILLS PAIN

The Soul of a Piano is the Action. Insist on the Otto Higel Piano Action

Food or Liq or?

England Should Stop Use of Grain in Distilleries

So long as the consequences fell only upon themselves it was the exclusive business of the people of Great Britain whether they used their grain supply for food or wasted it in making whisky. But when the people of Canada and the United States are ordered to put themselves on rations—and threatened with being put on a compulsory ration system—in order to save England from starvation, it became also the legitimate business of the people of this continent whether grain that is supplied to England is used for food or wasted in the manufacture of drink. It would be entirely justifiable if the governments of Canada and the United States stipulated that the destruction of grain in the distilleries of England must stop if the people of this continent are to be required to deny themselves food in order to supply grain to Great Britain.—Edmonton Bulletin.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, taken internally and acts through the blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Cure fails to cure. Send for circulars and testimonials.

F. J. CHENEY & CO., Toledo, Ohio. Sold by Druggists, 75c. Hall's Family Pills for constipation.

Really Polite

"The escaped convict was a very polite fellow."

"How so?"

"He left behind him a note for the warden asking to be excused for the liberty he was taking."—Baltimore American.

Minard's Liniment Cures Dandruff.

Force or Fame?

Germany will surrender nothing that she now holds until she is obliged to, whether in Russia, in Belgium, in France, or in the Balkans. Force or famine is the only argument she will ever recognize, and no talk about peace will begin to be real until she is beaten in the battlefield and her strength humbled and broken by privation and defeat.—London Daily Mail.

CUTICURA HEALS PAINFUL ECZEMA

Itched and Burned. Wanted to Scratch All the Time. Scarcely Any Sleep.

"When I was fifteen years old, eczema came in a rash, first on my head, then on my ears, and afterwards on my body. It was very painful and was itching and burning so I wanted to scratch all the time. I scarcely had any sleep."

"After I used four cakes of Cuticura Soap and six boxes of Ointment I was healed." (Signed) Mrs. R. H. Carlton, Country Steep Creek, Sask., Feb. 6 '17. Clear the pores of impurities by daily use of Cuticura Soap and occasional touches of Cuticura Ointment.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

Use For Everybody

(From the Philadelphia Public Ledger)

In these anxious and frugal days
the conscientious producers, who
have pretty generally pushed out
the conscientious objectors, are ask-
ing themselves what more they can
do toward winning the war—not
just for the sake of victory, but for
the sake of the free life of the world,
the fair chance for humanity, the
survival of high spiritual concepts,
the triumph of the right.

Some of us consider ourselves
valueless, or nearly so. We are all
inclined to settle down into a dull
rut of listlessness, feeling that we
do not count. We have no rich
gifts to put upon the altar. We
have no rare talents to direct any
sort of crusade "under spread en-
signs marching." We leave to the
mighty intellects the control and
the supervision. We leave to the
physically robust the active exer-
cises of obedience to orders. In
short, in the conviction of anemic
impotence, we let the rest do our
fighting for us, to make the world
safe for us while we hug the fire and
choose the cozy, comfortable nook.
In the shadow of the wall, we sit

and the tumult and the strain, the
dust and the noise in the hot glare
of brawling daylight go by on the
other side.

But all the man-power, women-
power and child-power of the world
are needed now. There are few per-
fect citizens. The business of the
earth depends on those who are in-
complete, on those whose souls out-
run their bodies, on those whose
reach exceeds their grasp, on those
who would like to do more than
they can do. The battle is not al-
ways to the strong. It is likely to
go to the combined forces of those
who are faithful unto the end in the
few things they are able to do.

The country in this crisis depends
on the last and the least among us.
It expects its half-men to do their
duty. It needs the services of the
mained and the halt. It needs
those who have only one or two of
their wits at work. It needs us as
long as we can stir a finger or wink
an eye. If you cannot run a mile,
you can walk ten feet. If you can-
not lift a hundred-weight, you can
raise a pound. Some work with a
steam hammer, some ply a needle,
some drive sheep and cows and some
run locomotives; some are sick in
bed and can do naught but pray;
all are serving. It is not a cou try
in which a crowd stands and waits
in silence for the issue of di-tant
battle; it is a country in which all
to the limits of their abilities are in-
tensely striving with a common
aim. When in doubt give all you
have and do all you can, and you
will not err. While the duty of the
citizens of any other land is unful-
filled the heavier burden rests on
us. When millions, deserting the
cause of human freedom, bow their
necks beneath the yoke it is for us
to prove our ardent love of liberty
by fighting the battle they refused to wage.

We are "all in it." We cannot
escape our present manifest duty—
though we may safely commit our
ultimate destiny to the Power that
has thus far led our nation and pre-
served us as a people unto this enor-
mous and unprecedented hour.

RED CROSS BULLETIN

The ladies of Didsbury are cordi-
ally invited to meet in the Red Cross
rooms every Wednesday afternoon
to do Red Cross sewing.

Tickets numbered 28 and 69 won
the checker board and cribbage
board. Holders of these tickets can
secure their boards by applying at
the Pioneer office.

May Be No Exemptions After This

A report from Ottawa says that
the amendments to the Military
Service Act, which were under con-
sideration by the cabinet, are said
to be very drastic. The war situa-
tion is serious and the demand for
more men so urgent that strong
measures are to be taken to speed
up the act. It is rumored that all
exemptions except physically unfit
are to be eliminated, practically no
excuse for men in class one will be
accepted, saving the farming class.
There is no intention of calling out
class two.

SHERWIN-WILLIAMS PAINTS & VARNISHES

"COMMONWEALTH" BARN RED

The Paint for Barns, Roofs, Fences, Etc.

S-W Commonwealth Barn Red is a bright, rich Red,
that works easily, covers well and dries with a fine,
smooth, durable finish. Put up in convenient sized cans,
all full Imperial Measure. Why not try it this year to
protect your barn against the weather?

You have a heavy investment in farm machinery,
implements, wagons, etc. Increase their life and useful-
ness by protecting them against rust and decay, by
using Sherwin-Williams Wagon and Implement Paint. The
longer they last the less they cost.

It is economy to use S-W Buggy Paint on your buggies
and carriages, and S-W Auto Enamel on your car. They
give entire satisfaction and are easy to apply.

Color schemes and suggestions for any
part of your building furnished by expert
decorators, free upon application and
without any obligation.

We carry a complete line of Sherwin-
Williams Paints and Varnishes. Ask
us for Color Cards, prices or any
other information you may require.

W. G. LIESEMER,
DIDSBURY.

Every Advantage

IS OFFERED A PRODUCER OF
Milk, Cream, Eggs and all Farm Produce
when delivering to the

Crystal Dairy Ltd.

We have just lately remodelled our plant and are prepared for Con-
densing milk, making various kinds of Cheese, Pasteurizing and Brine-
cooling Milk for shipping.

Your Sour Cream will be manufactured in Butter for the plant, and the
Sweet will be pasteurized, cooled, held in storage and shipped for table use
and ice cream manufacturing in the city.

As you already know we specialize, manufacture, and sell direct to the
consumer. We also have the largest regular trade to supply on the Alberta
market.

With this every-day outlet we know that when we give you a raise, it
will not be with a KICK—but the PRICE!

Our invitation to patronize us is open to everybody. Consider our
proposition carefully. Ask your neighbor how he has been treated in the
past and YOU WILL BE A NEW PATRON.

Come in and leave your order for a
NEW MILKING MACHINE

TOWN OF DIDSBURY

Assessment Roll 1918

NOTICE is hereby given that the
Assessment Roll of the Town of Dids-
bury for the year 1918 has been pre-
pared and is now open to inspection at
the office of the Secretary-Treasurer of
the Town from ten o'clock in the fore-
noon until four o'clock in the afternoon
on every day which is not a public
holiday except Saturday (and on that
day from ten o'clock in the morning
until twelve o'clock noon) and that
any ratepayer who desires to object to
the assessment of himself or of any
other person must within thirty days
after the date of this notice lodge his
complaint in writing at my office.

Dated at Didsbury this 27th day of
March A. D. 1918.

A. BRUSSO,
Assessor

DR. A. T. SPANKIE

LOST

A very small team of roan mare mules.
Reward for recovery. Whitcomb Hide and
Fur Co., Innisfail, Alberta. 2tp14

STRAYED

On the S. E. Qr Sec. 27-30-2, W. 5th
Mer, premises of J. J. Steckley, one small
sorrel mare, brand invisible, left eye out,
white hind feet, aged, in very poor con-
dition, been on premises for some time.
W. F. Sick, Brand Reader. 3tp13

HORSES FOR SALE

As I have rented my farm I would like
to dispose of about 30 head of horses,
mostly mares, colts and work horses.
RICHARD OLIVER. 4tp12

STRAYED

On the premises of Joe Bales, N. E. 1/4
30-26-29, W. 4th Mer, one buckskin
gelding, branded on right thigh;
left front foot wired out, aged, white
stripe on face. 4tp11

CATTLE WANTED

Cattle wanted for summer pasture to run
with own stock. Plenty of range, water
and shelter, and attendance by experi-
enced stockman. Haener Bros., Big
Prairie P. O. 3tp11

STALLION WANTED

Wanted to buy a Clyde Stallion, two-
year old this spring. Thos. Fitzgerald,
Crossfield, Alta. 4tp10

CATTLE WANTED

Farmers having cattle which they want
to pasture for the summer should apply
to T. J. Vernon, Didsbury. Big range,
plenty of water and constant attendance.
Applications must be made within the
next few weeks. 3tp-9

(Continued.)

The brakemen grinned, because the hint was plain. It is said on Western railroads that when a conductor collects a fare he throws the money at the car roof and accounts to the company for as much as sticks there.

"Well," said the first man, "I guess we'll take our chances and you can get into the caboose. You'll find blankets and a bunk where you can lie down if you take off your boots and we'll dump you somewhere handy for catching the next east-bound."

Foster found the caboose comfortably warm. There was a stove in the middle and two or three bunks were fixed to the walls. In a few minutes the train they waited for went roaring past, and when the freight started one of the men gave him some supper. Then he got into a bunk and went to sleep.

He caught the next express going east, and on reaching Ottawa where he had some time to wait, half expected the man he had helped would come, or send somebody to meet him. Although he wore the fur coat and stood in a conspicuous place, he was not accosted, and presently bought a newspaper. It threw no light on the matter and for a time he walked up and down, considering if he would go to the police. This was perhaps his duty, but it looked as if the owner of the coat had not been molested. After all, the fellow might be an absconding debtor, and if not it was obvious that he had some reason for keeping his secret. Foster decided to let him do so, and went to choose a comfortable seat in the train.

When he arrived at Montreal he went to the Windsor as he had been told, but there was no letter or telegram waiting and none came during the day or two he stayed. On the evening before he sailed he was sitting in the large entrance hall, which is a feature of American and Canadian hotels, when he thought a man some distance off looked hard at him over his newspaper. Foster only caught a momentary glimpse of his face, because he held up the paper as if to get a better light and people were moving about between them; but he thought the man was Daly, and after a few moments carelessly crossed the floor.

A man sat at the spot he had marked and the chairs on both sides were unoccupied, but when Foster sat down in the nearest he saw the fellow was a stranger. This puzzled him, since he did not think he had been mistaken. It was, however, possible that Daly had been there, but had moved off quietly when Foster's view was obstructed. If so, he must have had an object for hiding, and Foster waited some minutes before he went to the office and examined the guest book. Daly's name did not appear and he found that nobody from the West had signed the book recently.

"I wanted to see if a man I know is staying here," he told the clerk. "That's all right," said the other. "Quite a number of people have been looking for friends today."

Foster described Daly as well as he could, and asked if he had examined the book.

"No," said the clerk. "Nobody just like that had the register while I've been about; but now I think of it, a man who might meet the bill stood by while another looked at the last page." Then he indicated a figure near the revolving door.

"There! that's who he was with!"

As the man pushed the door round Foster saw his face, and knew him for the stranger who had occupied the chair in which he had expected to find Daly. He thanked the clerk and went back thoughtfully to his place, because it looked as if Daly had been there and the other had helped him steal away. If his surmise was correct, they might be trying to follow Featherstone; but he was, fortunately, out of their reach, and Foster decided that he must not exaggerate the importance of the matter. After all, Daly might have come to Montreal on business, and the rotunda of a Canadian hotel is something of a public resort. Still, he felt disturbed and presently gave the clerk the fur coat, telling him to deliver it when asked for. He felt it a relief to get rid of the thing.

Next day he sailed on an Empress liner, and on the evening after he

reached England left the train at a lonely station in the north. It was not yet dark, and for a moment or two he stood on the platform looking about. There had been rain, and the air had a damp freshness that was unusual in Canada. In the east and north the sky was covered with leaden cloud, against which rounded hilltops were faintly marked. Rugged moors rolled in long slopes towards the west, where the horizon was flushed with vivid saffron and delicate green. Up the middle of the foreground ran a deep valley, with blue shadows in its bottom and touches of orange light on its heathy sides. There were few trees, although a line of black firs ran boldly to the crest of a neighboring rise, and stone dykes were more common than the ragged hedges. Foster saw no ploughed land, and nothing except leather seemed to grow on the peaty soil, which looked black as jet where the railway cutting pierced it. Indeed, he thought the landscape as savage and desolate as any he had seen in Canada, but as he did not like tame country this had a certain charm.

While he looked about a man came up. He was elderly and dressed with extreme neatness in old-fashioned clothes, but he had the unmistakable look of a gentleman's servant. Though there was a small scar in the road, he was obviously not a professional chauffeur.

"You'll be Mr. Foster, sir, for the Garth?" he said.

Foster said he was, and the man resumed: "Mr. Featherstone sent the car and his apologies. He had to attend the court, being a magistrate, and hoped you would excuse his not coming."

Then he picked up Foster's portmanteau and called a porter, who was moving some clanging milk cans, to bring his bag.

"Never mind; I'll take it," Foster told him.

"As you like, sir, but it's perhaps not quite usual in this country," the other answered in a deprecatory tone.

"I suppose I ought to have remembered that," Foster agreed smiling.

They crossed the platform, and while they waited for the bag the man said respectfully, "Might I ask if Mr. Lawrence was better when you left, sir? It was a disappointment to

NURSING THE WOUNDED

It takes strength and courage to nurse the wounded. Every woman should make herself fit for war's call at home or abroad. Health and strength are within the reach of every woman. They are brought to you by Dr. Pierce's Favorite Prescription. Take this medicine, and there's a safe and certain remedy for the chronic weaknesses, derangements, and diseases peculiar to women. It will build up, strengthen, and invigorate every "run-down" or delicate woman. It assists the natural functions.

At some period in her life, a woman requires a special tonic and nerve.

If you're a tired or afflicted woman, turn to "Favorite Prescription," you will find it never fails to benefit. Sold in tablet or liquid form. Send Dr. Pierce, Pres. Invalids' Hotel and Surgical Institute, Buffalo, N. Y., (or branch, Bridgeburg, Ont.) 10c for trial pkg. tablets.

Toronto, Ont.—"I found 'Favorite

Prescription' a splendid tonic for women. Some time ago I became all run-down, weak, nervous and could not eat or sleep. Had severe backaches, pains in my right side. I took Favorite Prescription and it completely built me up in health and relieved me of all the annoying pains and aches."—Mrs. THOMAS GRANTHAM, 425 Front St.

Niagara Falls, Ont.—"During middle age, I began to go down in health. I would become dizzy, black spots would appear before my eyes. I also suffered with severe pains in the back of my head and my back would ache continually. I was most miserable when I began taking Favorite Prescription, but by its use I came through this critical period in a good healthy condition. It is a splendid medicine for women at this time of life."—Mrs. W. F. TESTER, 187 Bridge St.

first gun. It wasn't my regular duty, sir, but he was the only son and I looked after him. If I say so, we were much upset when we heard that he was ill."

Then the bag was brought, and as the car ran across the moor Foster noted the smooth, hard surface of the wet road. The country was wild and desolate, but they had no roads like this in Canada, except perhaps in one or two of the larger cities. Indeed, in Western towns he knew it was something of an adventure to cross the street during the spring thaw. The light got red and angry as they dipped into the valley; the first on the hillcrest stood out black and sharp, and then melted into the grey background. A river pool shone with a ruby gleam that suddenly went out, and the dim water vanished into the shadow, brawling among the stones.

(To Be Continued.)

British Rule in India

The following is taken from a letter from the quartermaster-general in India to the general officers commanding divisions and independent brigades:

"I am directed to point out that at present there appears to be considerable diversity of opinion regarding the number of buttons and the method of placing the same on the mattresses in use in hospitals."

"I am therefore to request that in future all hospital mattresses should be made up with fifty-three buttons placed in fifteen rows of four and three alternately."

This would convince our readers that even India has at last grasped the idea of the war and is getting a move on.—Tunch.

A certain tribe in the Zambesi country have to get along in an "altogether" costume for some time, the Ladies' Aid Society of the Baptist church of Gary, Indiana, having received word that its yearly contribution of clothing for the heathen went down on a steamship which recently struck a mine.

The use of cream has been discontinued for the period of the war at Rideau Hall, the residence of their Excellencies the Duke and Duchess of Devonshire.

CATARRH COLDS BRONCHITIS CURED WITHOUT DRUGS

It is really impossible to treat Catarrh, unless by inhaling the soothing germ-killing vapor of Catarrhazone. Its rich, fragrant essences are breathed from the inhaler to every sore, diseased spot in the breathing organs. Not a single germ can escape the healing fumes of Catarrhazone which acts on the infected linings of the nose and throat just as an ointment would act on a cut finger. You see Catarrhazone soothes, cleanses, heals. It cannot fail to reach and cure Catarrh; it's simply a wonder on weak throats, bronchial coughs, deafness, hoarseness, and all other symptoms of Catarrhal cold.

Get Catarrhazone today. Complete outfit costs \$1.00 and is sufficient for three months' use. Smaller sizes 50c. All dealers or the Catarrhazone Co., Kingston, Ont., Canada.

ENORMOUS INCREASE IN VALUE OF FIELD CROPS OF THE DOMINION

CANADA'S GREAT AGRICULTURAL POSSIBILITIES

While the Aggregate Marketable Value of the Grain Crops has Enormously Increased During the War Period, the Production Increase is Unfortunately but Fractional in Comparison

It is to be hoped that Nature will smile with favor upon the organized effort which the department of agriculture, under the leadership of the Hon. T. A. Crerar, is making to increase production on the farms of Canada during the ensuing season. Since the outbreak of the war there has been an enormous increase in the productive value of the field crops of the Dominion. According to a recent estimate of the census bureau the aggregate value of the grain, fodder and root crops for 1917 was \$1,144,636,450. Compared with the crop of 1914 this is an increase of \$506,056,150, or 79.25 per cent.

This increase, so far as value is concerned, is satisfactory as well as remarkable, materially contributing, as it has, to the wealth and prosperity of the country. Without it the Dominion could not have floated domestic loans to the extent she has. Neither could she have established the enormous credits she has in the half of the imperial government in order to provide payment for war material and food products purchased on export account.

On the other hand, however, this increase in productive value is very largely due to enhanced market prices, the gain in quantity of production being but fractional in comparison. And while value is necessarily a matter of great importance, quantity is even more so just now, when in the winning of the war an ample supply of food is as essential as an ample supply of munitions.

During the four-year period of 1910-13 Canada's annual average production of grain, ten descriptions, all, was 661,528,000 bushels. Last year it was 736,972,000 bushels, or a gain of but 11.40 per cent. by no means a matter for congratulation. The aggregate marketable value of these ten descriptions of grain for the harvest of 1917 was, on the other hand, in excess of that of the annual average of 1910-13 to the amount of \$552,585,350, or 171 per cent. the total figures being \$875,532,350 and \$322,947,000, respectively.

Of the various kinds of grain produced in Canada the principal interest naturally relates to wheat. In this particular grain last year's yield of 233,742,850 bushels exceeded the annual average of the 1910-13 period by 29,030,850 bushels, or 14.18 per cent. While this is a slightly better increase than the average for all grains, yet it pales into insignificance when the fact is taken into consideration that value increase was \$317,237,600, or 233 per cent. Had last year's increase in quantity over the 1910-13 annual average been one-half that credited to the value, we and our allies would be considerably less perturbed regarding the supply of breadstuffs than we are at present.

Oats, the next grain in order of importance, last year increased over the four-year period of 1910-13 by 51,763,800 bushels, or 14.73 per cent, while in value the appreciation was \$158,678,300, or 134 per cent.

While in view of the fact that only from 12 to 14 per cent. of the arable land of the Dominion is under cultivation, ample resources are available for increasing production, yet it would appear that, after all, the great need is more intensive cultivation rather than increased acreage. The average yield of wheat runs, as a rule, from two to six bushels per acre higher than in the United States, yet by the more general application of modern methods of cultivation the standard could undoubtedly be materially raised. This is a doctrine the late C. C. James preached persistently. And it will stand persistent preaching still, even granting that it may not be possible for wheat production in Canada to attain the high standard of 31 to 40 bushels per acre, as credited to the British Isles for the five-year period of 1911-15, yet it is undoubtedly within the realm of possibility to materially improve upon the 1911 average of the Dominion for the same period. Improved methods of cultivation will undoubtedly produce better average yields of all grain crops. And in this the three hundred and first year since Canada had its first distinct farm, it is particularly apropos that we should seriously set ourselves to the task of doing so.—Toronto Globe.

Canada's Trade

The last trade returns show that Canada's total trade has increased from \$1,000,000,000 in 1913, the year before the war, to \$2,024,000,000 in 1917. Export trade has increased threefold during the period, the figures being \$400,000,000 in 1913, and \$1,200,000,000 in 1917. In the year prior to the war Canada's bank clearings totalled \$9,260,000,000; last year the total clearings amounted to \$12,550,000,000, an increase of more than three billions.

W. N. U. 1200

Fighting the Submarine

Encouraging Survey of the Shipping Situation by a United States Publication

Official statements, both from the United States and England, give grounds for optimism concerning the general shipping situation. Mr. Bainbridge Colby, a member of the United States shipping board, goes so far as to say that the shipping problem is solved. "America's stupendous ship-building program is the answer to the submarine." The recent parliamentary statement of Sir Eric Geddes, the new first lord of the British admiralty, gives more definite reasons for thinking that the German submarine has done its worst. The net losses in British shipping in three and a half years of warfare, have amounted to two and a half million tons. That is, England has lost much less tonnage abroad now than in August, 1914. But the explanation for this falling off, Sir Eric says, is not primarily the German submarine. For the first two years of the war, the English shipyards almost stopped building merchant ships, devoting all their energies to constructing war vessels. The annual output of warships in England has exceeded the production of peace years by 300 or 400 per cent. The general impression that England's navy is at least twice as large as when war broke out is apparently substantiated by this official declaration. British yards can now turn their attention to recouping the losses in England's merchant fleet. Sir Eric supplies another new fact: had England in these three years of war maintained her construction of merchant ships on the pre-war level English shipping, despite the depredations of the submarines, would be two or three million tons to the good. Now that the British yards have begun building merchant ships on a much greater scale than prevailed before 1914, the chances of making good to losses seem favorable.

Since February, 1917, when Germany's unrestricted campaign began, England has lost three million tons—at the rate of about 300,000 tons a month. How much shipping has been constructed in that same period? From January 1 to June, according to Chairman Hurley, American yards launched 500,000 tons; that is, even before the United States adopted its present large program, we were building at the rate of one million tons a year. Shipping statistics are so entangled that it is impossible to tell how many tons England has turned out in this same period. We can get some idea of British capacity, even before the augmentations required by war, from the fact that, in 1913, British yards turned out three million tons. Probably the statement is therefore entirely justified that English and American yards have replaced at least two million of the three million tons which England has lost since February, 1917. But there have been other sinkings than those of English ships. The best figures estimate that Germany has been destroying about 500,000 tons a month of the world's shipping since she decided to play her last card. This is at the rate of six million tons a year. If English shipyards produce three million tons and American five million tons, it is quite apparent that Germany has failed, even though the English and American navies had no more effective method of handling the submarine. Though Mr. H. L. Ferguson, president of the Newport News Shipbuilding company insists that our yards will produce only three million tons in 1918, Chairman Hurley still promises five million tons.

So far as our program—the situation on paper—is concerned, the German submarine is already defeated. But our shipyards are still disorganized, the labor problem is still unsolved, and there is yet no definite assurance that we shall build five million tons this year. The necessity for action exists as much as ever.—From the World's Work.

The Canadians at Hargicourt

The Canadians who raided the German lines at Hargicourt, in the region between Cambrai and St. Quentin, are not a part of General Currie's corps, but consist of a Canadian cavalry brigade who, dismounted, take their place from time to time in the front line. They form part of Sir Julian Byng's third army, and have been down in the region east of Peronne, save during brief intervals, for the better part of a year. In March, 1917, these Canadian cavalrymen, mounted, followed up the retreating Germans from the Ancre Brook and harried their rear guards. They made some notable raids while in the line last summer, and were used as cavalry during the Cambrai operations. It was announced several weeks ago that the Canadian horsemen penetrated almost to Cambrai itself on that occasion and took many prisoners.—Toronto Globe.

Creamery Has Successful Year

During the twelve months ending October 31st, 1917, 187,000 pounds of butter was made at the creamery at Lanigan, Saskatchewan, cream being received from 760 farmers. A bonus of two cents a pound butter fat has been paid to all patrons, whether shareholders or not, but share holders also received a dividend in addition to the bonus.

GERMANY'S AMBITIOUS PROGRAM THE SUBJUGATION OF ALL NATIONS

DETERMINED TO ESTABLISH A WORLD DOMINION

No More Conscious Bid for World Power has been Witnessed Since the Days of Julius Caesar, but All the Deep-Laid Plans Seem Doomed to Failure

What Eleven Years Have Done

And What Can Be Accomplished on the Fertile Lands of Western Canada

In 1907 Mr. T. G. Flynn began farming in Alberta. At that time he was not overburdened with the world's goods. After riding more than sixty miles across country, he settled on a quarter section about twelve miles south of what is now the town of Czar, on the Canadian Pacific line from Winnipeg to Edmonton. He built himself a log hut and a sod barn, and with two Indian ponies broke about fifteen acres during his first season. Before winter he put up sufficient hay for his two ponies and two cows which he had secured as wages for work done for neighbors. In the following spring he procured seed and planted his land with wheat and also broke another fifteen acres. At this time the country was not so well settled as it is now. To reach the nearest railway more than sixty miles had to be trekked over indifferent trails. There was much to discourage a man working alone. But Flynn kept on. Then harvest time came. When he had threshed his meagre patch, he had more grain than on many a well-established farm in Ontario—the province he had come from.

Eleven years have elapsed since then. Mr. Flynn has experienced good and bad seasons, but he has steadily prospered. Today he is farming six hundred and forty acres, four hundred acres of which are under cultivation. He has one hundred and sixty acres in one summer fallow for seeding this spring. His receipts from grain alone last season approached very nearly to the ten thousand dollar mark. His log cabin has given place to a modern bungalow, with eleven rooms, lighted by its own power plant and supplied with an individual water unit. In place of a sod barn he has put up an up-to-date stock barn which has cost approximately \$2,000 to erect. A windmill and power house occupies the site behind his old log cabin.

Mr. Flynn has not specialized in any particular branch of farming, both grain growing and stock raising have received his attention. Year after year he has grown a larger area of wheat. He has always raised sufficient hogs to supply his home needs and to pay for harness, oil, and binder twine. He considers there is big money in a small number of hogs in Alberta at any price. He has gone in for Shorthorn cattle, and at the present time eighty head bear his brand. In place of the two cayuses with which he began, he has twenty head of first-class working horses.

The success of Mr. Flynn is not extraordinary. It is just a fair example of what can be accomplished on Alberta's fertile lands by one who is determined to succeed. "Is it possible to duplicate Mr. Flynn's success now?" may be asked. The answer is "Yes." Compared with eleven years ago conditions are, if anything, more favorable to success than they were then. For all his produce the farmer is now receiving prices which at that time were undreamed of. Improved roads and closer proximity to railways enable him to place his produce on the market with considerably less expense and trouble than was the case a decade ago. Social conditions have also greatly improved during the last ten years. It seems reasonable to predict there will be more examples of such success as Mr. Flynn's in Alberta during the next decade than there has been in the last.

Characteristic Britons

Glasgow had undertaken the erection of new buildings for a British industries fair. It was to have been in full swing March 11 to March 22. Prolonged frost blocked progress on the buildings and the opening date has been advanced to May 6.

Old London, despite its air raids and war-time worries, will open a similar fair on March 11 as arranged.

No doubt the British people find this war a beastly annoyance, but industrial fairs are necessary, and, really, they must have them.—Ottawa Journal.

Mrs. Alljaw was feeling sentimental and pensive. "When I die," said she to her husband, "I want you to have this sentence placed on my monument: 'There is peace and quiet in heaven.'" "I think," rejoined Mr. Alljaw, "it would be more appropriate to say: 'There was peace and quiet in heaven.'"—The Argonaut.

Germany's Program

No More Conscious Bid for World Power Since the Time of Julius Caesar

Never since the days of Julius Caesar has there been a more conscious and resolute determination to establish a world dominion by the subjugation of all nations, peoples, kindreds and tongues, and by the mastery of the seas. The German scheme appears to have been (1) in conjunction with Austria-Hungary to secure complete ascendancy in the Near East; (2) to crush France, annex her eastern provinces, and reduce her to permanent subordination to the policy of Berlin; (3) to absorb into the Teutonic empire, in one form or another, Belgium, Holland, Denmark, and Norway; (4) to challenge and destroy Great Britain, obtain the command of the sea, and form a great colonial empire out of the British dominions; (5) finally, if necessary, to defy the Monroe Doctrine and secure the hegemony of the New World.

A variety of causes postponed the inauguration of this predatory program, the most important being the revival of the principle of the balance of power and the consequent formation of the Triple Entente. In this effort to maintain peace with honor, and to support alike the concert of Europe and national independence, France (the power most immediately menaced) took the lead in 1891 when she made a military convention with Russia; Russia took the next step in initiating the negotiations which terminated in the definite Franco-Russian alliance of 1894; Great Britain followed, a late third, alarmed in her turn by the Kruger telegram, the marked German unfriendliness to the Boer war, and, above all, by the German navy bill of 1898 and 1900 which obviously portended a challenge to British sea power. She made an entente with France in 1904 and with Russia in 1907. Thus was restored the balance of power in Europe, and by means of it German ambition was held in check, and peace among the greater states maintained till 1914.

It was hoped that Germany would realize that to succeed in her inflated dreams of world dominion in the face of so formidable a coalition would be impossible, and that accordingly she would recover from her madness and would return to the paths of equality and harmony. But it was not to be. She was drunk with the easy victories of 1864-71, exalted by material prosperity, obsessed by a conviction of her own pre-eminence, filled with jealousy, hatred and contempt for all other peoples. Hence in 1914, when she thought that the scales inclined decisively in her own favor, she put her fortunes and the fate of the world to the test, and proclaimed the advent of "The Day." Fortunately, she had made gross miscalculations, and victory did not so speedily or so conclusively crown her arms as she had expected; but "even now it is scarcely possible to realize how appalling was the danger from which we escaped, and how fatal would have been the least weakness or delay during the critical days at the beginning of August, 1914."

The Triple Entente, unhappily, had not been strong enough to establish a balance of power stable enough to maintain the peace of the world; France, Russia and Britain were all weakened by internal disorders and military unreadiness. It was, however, to the amazement and dismay of Germany, strong enough to put a check upon the first wild rush of the Teutonic hosts towards victory, and strong enough, as we trust, to prepare the way for the final discomfiture of their plans for universal empire. It is to the restoration of the balance of power, with its ideals of liberty and equality for all nations great and small, that we confidently look as the immediate outcome of the victory of the allies in the present war.—Prof. F. J. C. Heaththorn in the Fortnightly Review.

Alberta Fur Production

It is estimated by one of the leading fur dealers in Calgary that the amount of the returns from fur production in Alberta this year will be between ten and fifteen million dollars. This is a considerable increase over any previous year, and a large export business is developing. It is said that before the summer comes 50,000 coyote pelts and 1,500,000 rat skins will have been shipped out of the province. A large number of the rat skins are going to England to be used in lining coats for men in the aviation division.

The government of Uruguay will establish a school for farm foremen, the pupils being limited to young men unable to pay for their education.

"No Evidence of Adulteration in Formaldehyde"

DEPUTY MINISTER CRAIG SAYS IT IS ABSOLUTELY SAFE TO USE THE DRUG

The following telegraph dispatch has been received from H. A. Craig, deputy minister of agriculture for Alberta:

"Early last week the provincial department of Agriculture received numerous reports from various points of the province that seed treated with formaldehyde was not germinating. Immediately the department secured samples, treated seed and had it placed in germinators by Prof. Cutter at the university and by the agronomists at the schools of agriculture. Chemical tests were also commenced by the provincial analyst, Mr. Kelso. Reports of five days' germination tests of seed treated with formalin from 25 different parts of the province shows seed of high germination and strong vitality. Nineteen samples at the university tested an average of 98 per cent. for treated seed at against 99 per cent. for untreated seed of similar kind and origin. The provincial analyst says: 'I find no evidence of adulteration of any kind whatever in the samples submitted to me for analysis.' From the evidence at hand the department feels absolutely safe in stating that formalin has not been adulterated and will not result in injury to seed, if fresh, clean formaldehyde is used at the rate of one pound to forty gallons of water."

Farm Labor Surplus

C. Hotchkiss, chief Publicity Commissioner of the Dept. of Agriculture, states that the Provincial Labour Bureaus throughout the Province now report a surplus of farm labor. Farmers who may require further assistance, are requested to apply without further delay to the nearest Provincial Farm Labour Bureau stating full particulars of their needs, wages, time of service, etc.

There is a large number of married couples who desire work for both man and wife and the Department is particularly anxious to hear from farmers who may require such service.

Millinery

Carstairs and Olds

The ladies of Didsbury are cordially invited to inspect my stock in either town if in need of Millinery.

Mrs. H. W. Curry

You need not send away for that printing, the Pioneer office is well equipped for the work.

The Amusement Tax Act

To take effect on, from and after May 1st, 1918.

Every person attending an exhibition, performance or entertainment at a place of amusement to which an entrance or admission fee is charged shall on each admission thereto pay an amusement tax at the following rates:

- (1) When the price of admission is from 10c to 20c inclusive, a tax of 1c.
- (2) When the price of admission is more than 20c and not more than 75c, a tax of 2 1/2c.
- (3) When the price of admission is more than 75c and not more than \$1.00, a tax of 5c.
- (4) When the price of admission is more than \$1.00 but not more than \$2.00, a tax of 10c.
- (5) When the price of admission is more than \$2.00, a tax of 25c.
- (6) A tax of 25c shall be paid by every person attending any boxing bouts or contests.
- (7) Where admission is given by pass or complimentary tickets a tax shall be payable at the highest rate charged for the performance to which admission is granted.

PENALTIES

Every person who, without having previously paid the tax provided by this Act, enters a place of amusement in the province for the purpose of attending an exhibition, performance, entertainment or game shall be liable, on summary conviction, to a penalty of not more than \$50.00 for each offence, and in default of the payment of the fine and costs, to imprisonment for not more than six months.

Every owner of a place of amusement and every employee of an owner of a place of amusement who permits or authorizes or is a party or privy to the admission of any person to a place of amusement for the purpose of attending an exhibition, performance, entertainment or game therein without payment of the tax provided for by this Act shall be liable, on summary conviction to a penalty of not less than \$25.00 nor more than \$200.00 for each offence, and, in default of payment of the fine and costs, to imprisonment for not more than six months.

E. TROWBRIDGE,
Deputy Provincial Secretary,
Edmonton, April 15th, 1918 3 16

NOTICE!

In the Matter of the Enforcement of "The Motor Vehicle Act."

NOTICE is hereby given that the provisions of The Motor Vehicle Act are to be rigidly enforced. There is no defence for a person operating an unlicensed motor vehicle at this date, as immediate delivery of Automobile Number Plates may be obtained not only at the Departmental offices at Edmonton, Calgary and Lethbridge, but also from the Clerks of the Court at Peace River, Wetaskiwin, Camrose, Stettler, Red Deer, Medicine Hat, Bassano, Macleod and Taber, and from the Process Issuers at Fort Saskatchewan, Vegreville, Lloydminster, Sedgewick, Hardisty, Coronation, Vermilion, Wainwright, Oyen and Youngstown.

The Motor Vehicle Inspectors of the Department have instructions to see that the Act is strictly enforced in its entirety.

DATED at Edmonton, this 11th day of April, A. D. 1918.

E. TROWBRIDGE,
Deputy Provincial Secretary

READ THIS--SAVE MONEY

A STORY ABOUT MR. ADD: He is the most abused man in the world. People abuse him only because he can't fight back, that is, he is 'way above such things and wouldn't think of such gutter tricks as fighting. You see him every day, with the world of commerce on his back, going slowly along toward his goal—HE ALWAYS GETS THERE—but sometimes so many obstructions are put in his way that he has hard work getting to the top, but if you equip him properly you will see the burden he carries gradually come over the top of mediocre business, looming head and shoulders above the crowd, who are ever ready to jeer at him until he attains his end, then you and the rest say—"WHAT A LUCKY PERSON HE WAS."

You are walking the weary way, let Mr. Add help you along. Ask him to lighten your load—get you there far quicker than you can possibly do it by yourself. See him smile! He's willing, but you must make the effort yourself—of asking his willing assistance. Give him a new dress every time you approach him, as he works far better, the attention he attracts everywhere is entirely due to his personal appearance.

You know him—know him well. He is the ADVERTISEMENT! His dress is the body of the advertisement, the burden is additional business. His goal is whatever you choose to set. Mr. Merchant, without him, you carry your own load. Let THE PIONEER tell its 500 readers your message. They will be attracted and respond just in proportion to the efficient dress in which you fit your advertisement. Let us help you. IT IS THE CHEAPEST ASSISTANT IN THE WORLD.

THE DIDSBURY PIONEER

A Truck for the Farmer

FARM equipment which will effect a time and labor-saving, and therefore a money-saving, must be carefully considered by every good farmer now-a-days.

The farm wagon, which for years was the most useful of all farm equipment, is now being replaced on the best farms by a sturdy, dependable motor truck. The truck will haul any farm product—fruit, grain, vegetables, stock, fertilizer, or wood—around the farm, or to the town or city many miles distant, in half the time, and at a much lower cost.

The Ford One-Ton truck is a rapid, economical and very serviceable means of transport. One of these on your farm will save you weeks of time in a single season and will enable you to pass through a crisis of labor shortage with less difficulty.

The Ford truck is supplied as a chassis only. This permits you to select any of the many body styles especially designed for the Ford truck and already on the market. Thus you can mount the one which suits your individual requirements.

Price \$750 f.o.b. Ford, Ont.

Three of the many body styles that may be mounted on the Ford truck chassis

Not Wanted in Canada

Knightships are not to be despised and, if given with care and for merit, are not incompatible with our democracy. But for the sake of common sense and a decent regard for what the institution stands for, don't let us be conferring them upon every Tom, Dick and Harry who happens to have social pretensions. As for hereditary titles, whoever is responsible for them should be plainly told that they are not wanted in Canada.—Ottawa Journal.

The Worst of All

The trouble, as a friend remarked to us the other day, is that there are too many brainless days.—Philadelphia Enquirer.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

STORMY WEATHER HARD ON BABY

The stormy, blustery weather which we have during February and March is extremely hard on children. Conditions make it necessary for the mother to keep them in the house. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will not fail to break up colds and keep the health of the baby in good condition till the brighter days come along. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Great Head Work

"What is the secret of Wyse's success as a bill collector?"
"When a debtor tells him to call the next day at four, he calls at three and catches him in."

"What did you get out of that will case?"
"One hundred and fifty thousand dollars," replied the second lawyer.
"Good round sum, eh?"
"Yes, but I thought the old man left more than that."—Boston Transcript.

Doom of King Alcohol

When Every Grog Shop in the Country Is Closed Forever

Some morning, between now and A.D. 1925, we shall awake to find that every cheap grog shop in the country is closed forever. How this will add to the gains of the world! The American nation will be richer at the close of every year than it is now by more than \$1,000,000,000, which is now expended for whisky. With the vast sum saved, how the comfort of the toiling masses will be increased! Their poverty will be translated to competence, their homes made hygienic and comfortable, industrial and scientific schools will be established for them and the unmitigated sorrows of their wives and children will be comforted. "The prisons and penitentiaries of the present time will be relieved of more than half their inmates, the insane asylums will be depleted, and fewer children will come into the world with defective minds and bodies." The world will then take a mighty leap forward into "the good time coming."—Los Angeles Times.

YES! LIFT A CORN OFF WITHOUT PAIN!

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.

It Might Be True

Proverbial inability of the British to understand American speech was illustrated anew at Newport Harbor recently. Secretary Baker was on an inspection tour. In going from one camp to another he had to cross a stretch of water. A British cruiser was nearby and the commander, in an inquisitive mood, signalled to an American war vessel asking who was in the boat flying the official flag. "The secretary of war," was the response. "Thank you," said the Britisher. "Don't mention it," said the American. Then the British wig-wagged once more. "You may trust us. The matter will be kept secret," is what he said.—The Argonaut.

No surgical operation is necessary in removing corns if Holloway's Corn Cure is used.

"You simply cannot trust anybody. Everyone seems so dishonest nowadays," declared the woman. "My maid, in whom I had the utmost confidence, left me suddenly yesterday and took with her my beautiful pearl brooch."
"That is too bad," sympathized the friend. "Which one was it?"
"That very pretty one I smuggled through last spring."—Pittsburgh Chronicle-Telegraph.

HOW MRS. BOYD AVOIDED AN OPERATION

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided that I would have to go through an operation before I could get well."

"My mother, who had been helped by Lydia E. Pinkham's Vegetable Compound, advised me to try it before submitting to an operation. It relieved me from my troubles."

so I can do my house work without any difficulty. I advise any woman who is afflicted with female troubles to give Lydia E. Pinkham's Vegetable Compound a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N. E., Canton, Ohio.

Sometimes there are serious conditions where a hospital operation is the only alternative, but on the other hand so many women have been cured by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, after doctors have said that an operation was necessary—every woman who wants to avoid an operation should give it a fair trial before submitting to such a trying ordeal.

If complications exist, write to Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice. The result of many years experience is at your service.

ARE YOU SATISFIED

With your work, with your business?
Is there promotion ahead of you?

Men of energy, with salesmanship ability will find it to their advantage to write to—
THE EXCELSIOR LIFE INSURANCE CO., Toronto

"SCRAP IRON."

You can reap double profit by shipping before March first. Our contracts with munition works demand that we get one hundred cars mixed scrap for February, for which we will pay a premium. You will also save by shipping before freight rate advance. If prepared to make shipment write or phone us for prices. During Bosphorus we will be pleased to have you call and talk it over.—DOMINION METAL EXPORTING CO., Cor. Charles and Sutherland, Winnipeg.

A Valuable Pamphlet

In order that intending settlers in Western Canada may be properly informed as to the system of government which prevails in this country, the Canadian Pacific Railway has just issued through its department of colonization and development a pamphlet entitled "Canada's System of Government," which explains in very simple language the general principles of municipal, provincial and dominion government in this country. A copy of the pamphlet may be had without charge by addressing Robert J. C. Stead, Department of Colonization and Development, Canadian Pacific Railway, Calgary.

They Soothe Excited Nerves.—Nervous affections are usually attributable to defective digestion, as the stomach dominates the nerve centres. A course of Parmed's Vegetable Pills will still all disturbances of this character, and by restoring the stomach to normal action relieve the nerves from irritation. There is no sedative like them and in the correction of irregularities of the digestive processes, no preparation has done so effective work, as can be testified to by thousands.

The World Will Rub Along

The world perhaps will rub along when women have the vote much as it did when they had not. But there will be one less grievance, one less injustice, one less gap between the theory and practice of democracy.—London Daily Mail.

CORNS LIFTED OUT WITH YOUR FINGERS!

You get real action on a bad corn when you touch it with a drop or two of Putnam's Extractor. Out comes the corn, all shriveled up, peels right off the toe, roots and all. It sure is real happiness to get an old offender removed so quickly. Putnam's never fails, doesn't hurt when you're using it, never hurts afterwards. Nothing else so quick, so sure or painless. Costs but a quarter in any drug store. Get Putnam's today.

Money in Seed

This Farmer Received \$15,000 For His Timothy Crop

A farmer of the Pincher Creek district of Southern Alberta has just received a check for \$9,900 for timothy seed grown by him last year, and, in addition, has sold his threshed hay for \$5,000. A high standard of timothy seed has been set by the farmers of this district with the result that there is an eager demand for it among buyers. This year the whole of the crop of the district, amounting to some 400 tons, was sold to one firm—probably the largest individual purchase of timothy seed ever made. Seventy per cent. of it graded No. 1, and the handsome price of 10c a pound was secured for it.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the cures which it performs. Expect real relief and permanent benefit when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed.

Force or Famine?

Germany will surrender nothing that she now holds until she is obliged to, whether in Russia, in Belgium, in France, or in the Balkans. Force or famine is the only argument she will ever recognize, and no talk about peace will begin to be real until she is beaten in the battlefield and her strength humbled and broken by privation and defeat.—London Daily Mail.

Minard's Liniment for Sale Everywhere.

A man, overtaking a couple of friends, heard his own name mentioned, and asked what it was they were saying of him.
"Well," answered one of them, "to tell the truth, we were disputing as to whether you are more fool or rogue."
Taking an arm of each he said: "I think that I can best settle that—I believe I am something between the two."—Tit-Bits.

Wood's Phospholine.
The Great English Remedy. Tonic and invigorates the whole nervous system, makes new blood in old veins, cures nervous debility, anemia, and brain worry, leprosy, loss of energy, palpitation of the heart, fainting, memory. AROUND THE TOWN

Mr. Ray Craddock, who was
graduated this spring from the Ed-
monton Bible Institute, has come to
take up the work as Assistant Pas-
tor with Rev. D. C. Eby of the M.
B. C. church.

W. S. Long, who purchased the
Noehren-Axtell farm a few days ago,
is installing a 10-20 Titan tractor
which he purchased from W. G.
Liesemer. Mr. Long took the tractor
out to his farm on Tuesday.

Cassandra Rebekah Lodge of the
I. O. O. F. will hold a masquerade
ball, Friday evening, April 26th,
at the Opera House. Part proceeds
in aid of Red Cross. Admission \$1
per couple, extra lady 50c.

The auction sale held by Chris
Noehren a few days ago brought in
nearly \$10,000. Cows went as high
as \$147.50, the average being more
than \$100 per cow. Everything
brought exceedingly good prices.
Sexsmith was the auctioneer in
charge.

Harry Pearson, Reeve of Mount-
ain View Municipality, returned
from a two months visit to his
father in California on Friday last.
Harry had a good time especially
as he was laid up with a severe at-
tack of the measles for two weeks.
However, he looks well and says he
had a good time.

W. Farrington, manager of the
Opera House, has made arrange-
ments to give two extra picture
shows each week, half of the net
proceeds of which are to be given
to the Red Cross and Ogden Con-
valescent Home. This week the
proceeds are to be given to the Red
Cross. Manager Farrington is to
be congratulated on his patriotic
efforts in helping these good causes
along.

Did you put on the hands of the
clock an hour on Sunday? If you
did not you will be like the cow's
tail, always behind. The new day-
light saving law went into effect on
Sunday last and it does not seem to
have very bad effects yet except to
upset the kiddies sense of the fitness
of things at bedtime and in the

JUDICIAL SALE OF FARM PROPERTY

Pursuant to the Order Nisi and the
final order for sale in Carlson and Car-
son, Executors of the Oson Estate,
and Austin to Jas Schantz, there will
be sold with the approval of the
Master, by J. N. Patton at his office,
Didsbury, Alberta, at 2 o'clock in the
afternoon on

Saturday, the 11th day
of May, 1918

the following lands and premises name-
ly the North West Quarter of Section
30, in Township 30, Range 2, West of
the 5th Meridian, Reserving unto His
Majesty all mines and minerals and
subject to the reservations and con-
ditions contained in the Grant from
the Crown or in the existing Certificate
of Title.

The Vendor is informed that the
land is all fenced and that 30 acres
have been under cultivation. The
soil is a black loam with yellowish clay
sub soil and on the said land there are
a one storey frame house in fair state
of repair, a two storey frame barn with
a lean to on each side and a good well
with a windmill and large metal stock
tank. The property is very good in
general appearance, being about 10
miles South West of Didsbury.

The property will be subject to a
reserve bid which has been fixed by
the Master. The purchaser is at the
time of sale to pay down a deposit of
20 per cent. of the purchase price to
the solicitor for the Vendor and the
remainder of the purchase price to be
paid into Court to the credit of this
action as follows: that is to say—

20% in 6 months with interest at 8%
per annum.

20% in 12 months with interest at
8% per annum.

20% in 18 months with interest at
8% per annum.

20% in 24 months with interest at
8% per annum.

or the purchaser may pay cash if he
so desires.

In all respects the terms and con-
ditions of sale will be the standing con-
ditions as approved by the Master or
a Judge of this Honorable Court. Further
particulars may be had from the
auctioneer or Earl E. Freeman,
Didsbury, Alberta, Solicitor for the
Plaintiff.

Dated at Calgary, Alberta, this 16th
day of April, 1918.

(Sgd.) LAURENCE J. CLARKE,
Clerk of the Court.

Approved: "L. F. C."
M. C.

morning. However, we'll all get
used to it in time.

Master Russel Berscht made a
clean-up at the Edmonton and Cal-
gary Horse Shows with his Shetland
ponies. He won first, two thirds and
a fourth prize as well as a first for
best boy rider at Edmonton, and
two firsts and two seconds at the
Calgary show, one of which was a
championship. The Calgary-Can-
adian reported as follows: Russel
Berscht was in with in his little
pony, and when a red ribbon was
handed him it was certainly the
most popular award of the whole
show. The kiddies rocked with ap-
plause, for they thought the little
fellow could not be beaten by any
champion. All were pleased with
the last award.

NOTICE

Rural Municipality of Mountain View No. 310

In the matter of the court of con-
firmation of the Tax Enforcement Re-
turn of the Rural Municipality of
Mountain View No. 310.

TAKE NOTICE that His Honor
Judge Winter, Judge of the District
Court of the District of Calgary will at
the sittings of the Court on Wednes-
day, the fifth day of June, 1918, at
11 o'clock in the forenoon, in the
Court Room at Didsbury, confirm the
Tax Enforcement Return of the Rural
Municipality of Mountain View No.
310, for taxes due to the said Munici-
pality to December 31st, 1917.

Dated at Didsbury this 27th day of
March, 1918

A. BRUSSO,
Secretary-Treasurer

Of Interest to Farmers

To avoid delay and inconvenience
in having their Spring harness and
repair work done in time to go on
the land, I would strongly advise
farmers to bring their work in early
and give us a chance to give you
that good work and satisfaction that
is so difficult to give when over-
crowded with work. Our prices for
repairs are very reasonable and
mean a big saving when high prices
of new harness are considered. We
clean, oil and blacken harness for
\$3.00 per set team harness.
Bring yours in and see us make it
look like a new set.

This year I am showing some special
good lines and values in

Plow and Spring Team Harness

Have you seen the new 4-ply water-
proof heavy canvass belting harness?
This new harness material I am sure
will interest you and I will be glad
to have your opinion on them.

I have in stock

all harness repair parts, also
driving, buggy, democrat and
team harness, saddles and all
riding equipment.

My line of

Travelling Goods

is very complete and at prices that
will compete with the largest firms
in the West.

SYNOPSIS OF CANADIAN NORTH-
WEST LAND REGULATIONS.

THE sole head of a family, or any
male over 18 years old, may home-
stead a quarter section of available Do-
minion land in Manitoba, Saskatchewan
or Alberta. Applicant must appear in
person at the Dominion Lands Agency
or Sub-Agency for the District. Entry
by proxy may be made at any Dominion
Lands Agency (but not Sub-Agency), on
certain conditions.

Duties—Six months residence upon
and cultivation of the land in each of
three years. A homesteader may live
within nine miles of his homestead on a
farm of at least 80 acres, on certain
conditions. A habitable house is required
except where residence is performed in
the vicinity.

Live stock may be substituted for cul-
tivation under certain conditions.

In certain districts a homesteader in
good standing may pre-empt a quarter-
section alongside his homestead. Price
\$3 per acre.

Duties—Six months residence in each
of three years after earning homestead
patent; also 50 acres extra cultivation.
Pre-emption patent may be obtained as
soon as homestead patent, on certain
conditions.

A settler who has exhausted his home-
stead right may take a purchased home-
stead in certain districts. Price \$3.00
per acre. Duties—Must reside six
months in each of three years, cultivate
50 acres and erect a house worth \$300.

W. W. CORY, C.M.G.,

Deputy of the Minister of the Interior,
